SUMMARY

Software Engineer with **2+ years of experience** developing scalable **full-stack and AI-powered applications** across web and mobile platforms. Proficient in the **MERN stack**, React Native, **Java Spring Boot**, AWS, and GCP, with experience in microservices, REST APIs, CI/CD, DevOps, authentication, and **LLM integration**. Ability to **build and optimize** user-focused solutions for enterprise and consumer applications while collaborating across teams.

WORK EXPERIENCE

Software Engineer | Walmart | USA

May 2026 - Present

- Provide **L2 production support** for Walmart Seller Center across **MX and CL**, resolving seller-facing incidents and technical issues impacting **10K+ sellers** while meeting priority-based SLAs.
- Monitor and troubleshoot distributed production systems using **Grafana and OpenObserve**, analyzing application logs, metrics, and end-to-end service flows across **15+ interconnected services**.
- Debug data and integration issues using **SQL, REST APIs, and Apache Kafka**, investigating topics, message payloads, and database records across workflows involving **\$10M+ in reimbursement value**.
- Partner with **engineering and development teams** to resolve **40+ production incidents**, providing technical findings and reproduction details, coordinating escalations, validating fixes, and supporting **RCA**.

Web Developer | EMNSPC UTA | USA

Jul 2025 - Apr 2026

- Redeveloped the EMNSPC department website using **WordPress, CampusPress, and Divi**, replacing a legacy web experience with a responsive, component-driven architecture supporting **80+ research pages**.
- Built **reusable UI components and CMS-driven content workflows** for research areas, publications, faculty profiles, and industry collaborations, streamlining content management for **30+ researchers**.
- Optimized **frontend rendering, responsive layouts, navigation architecture, and content delivery** across desktop and mobile, improving page-load performance by **20%**.

Software Engineer | Lineup Studio | India

Jun 2025 - Nov 2025

- Engineered a responsive production website using **React.js, JavaScript, Tailwind CSS, and Supabase**, delivering a public-facing platform showcasing **8+ architectural projects and 50+ optimized image assets**.
- Built reusable **React components, responsive UI modules, and Supabase-backed CRUD workflows**, developing a dedicated admin dashboard to manage project content, images, and website data dynamically.
- Optimized frontend performance by converting **50+ high-resolution images to WebP**, implementing **lazy loading and resource preloading**, and improving **Core Web Vitals and page-load performance by 30%+**.

Frontend Developer | eSeller Hub | India

Jan 2023 – Jul 2023

- Contributed to a customer-facing **e-commerce platform**, developing **8+ responsive UI features** across product listings, product details, search, cart, and checkout workflows using reusable React components.
- Integrated **10+ REST APIs** for product, inventory, pricing, and order data, implementing client-side data fetching, loading/error handling, and caching to improve responsiveness across key shopping workflows.
- Improved code quality through **85%+ Jest test coverage**, reusable component patterns, debugging, and Git-based code reviews while collaborating in **Agile Scrum sprints** to deliver features across multiple releases.

ACHIEVEMENTS

- **Datathon Winner (UTA, Apr 2025)**: Captured 1st place out of dozens of competing teams by designing, building, and deploying *PediBot*, a full-stack RAG AI assistant optimized to accelerate complex text and database queries.
- **Hackathon Runner-Up (UTA, Mar 2024)**: Secured 2nd place in an intensive rapid-prototyping sprint by delivering highly scalable web applications through creative technical problem-solving.

TECHNICAL SKILLS

- **Languages**: Java, JavaScript, TypeScript, Python, SQL, HTML5, CSS3
- **Frontend & Mobile**: React.js, React Native, Tailwind CSS, Responsive Web Design, Jest
- **Backend & APIs**: Node.js, Java Spring Boot, REST APIs, Microservices, CRUD, API Integration
- **Databases & Data**: PostgreSQL, Supabase, SQL, DBMS, Data Pipelines, ETL
- **AI & Generative AI**: LLMs, RAG, Vector Databases, Prompt Engineering, AI Agents, Multi-Agent Systems
- **Cloud & DevOps**: AWS, GCP, Docker, CI/CD, Git, Vercel
- **Messaging, Monitoring & Tools**: Apache Kafka, Grafana, OpenObserve, Jira, GitHub, Agile/Scrum

EDUCATION

Master of Science (Computer Science) | University of Texas at Arlington, USA | **GPA: 4.0/4.0** **Aug 2023 – May 2025**

Bachelor of Technology in Computer Science and Engineering | Ahmedabad University, India **July 2019 - May 2023**
